and

Mathematics Department
Are proud to present our 6th

Alumni Career Seminar

October 26th, 2000

4:00-5:00pm

Applied Physics & Math 2402

The UCSD alumni below will be speaking about their educational and career background and their current employment. Come hear about the twists and turns our alumni have taken en route to their current exciting careers! The seminar also allows time for speakers to answer your questions.

Our speakers' varied career experiences include acoustic signal processing, two-way satellite messaging and positioning systems, software engineering, creating computer games, writing video editing software, creating computer based training, developing risk and fraud models for the credit industry, and singing opera!

Tony de Paolo

Vice President for Technology – Qualcomm

B.A. in Applied Mathematics - **UCSD 1982**
