TOTAL COMMENTS: 14

- 1) Caleb is very knowledgeable of the material. He knows how to explain it well and encourages the students to pay close attention to details. Thanks Caleb!
- 2) N/A
- 3) Always helpful and readily available for office hours. Has a very friendly personality.
- 4) Great job!
- 5) Caleb was the best math TA I have had so far at UCSD. He was always available and extremely helpful. He helped me to understand a lot of what the professor didnt explain clearly, which was a lot!
- 6) Very professional.
- 7) Caleb Is a cool ta and is very helpful, usually. However, sometimes he seems to stumble on himself when writing on the bored. No complaints otherwise. He is always helpful and available when he says he will be.
- 8) I think the department and the professors need to ask TAs to provide the review sections before the midterms and final. Normally, the discussions are just for the homework basically. Caleb provides us more than enough office hours which is really good and helpful to the students. He is friendly and helpful to the students so I would recommend other students to take Caleb as TA. Finally, I would love to have the review sections. Thanks
- 9) Would help if TA briefly reviewed main points discussed in class.
- 10) Great TA. Makes things easy to understand and is very helpful.
- 11) So Kaleb was the TA for A03 and all my comments are related to him. He was incredible. Not only did he have a very competent grasp of all the material (which seems to be rare as TAs forget how to do "simple" math) he also was able to effectively teach us tricks to make the problems easier.
- 12) This review is actually for Caleb. Rosanna does not TA A04, Caleb does.
- 13) Some times I thought she spoke too softly, it was very hard to hear.
- 14) I love the TAs, I have attended both of the TA Sections, and they both do a wonderful job of explaining the material. Specifically, Caleb eplains the problems excellently and I really appreciated the way he could solve any problem you asked him too, and could then show you how to solve it. I have been a tutor before and I know that there is a big difference between understanding something and being able to eplain it to others. Thank you so much. :)
