

Math 10C
Midterm Exam 1
April 19, 2011
...
Version A

Instructions

1. No calculators or other electronic devices are allowed during this exam.
 2. You may use one page of notes, but no books or other assistance during this exam.
 3. Write your *Name*, *PID*, and *Section* on the front of your Blue Book.
 4. Write the *Version* of your exam at the top of the page on the front of your Blue Book.
 5. Write your solutions clearly in your Blue Book
 - (a) Carefully indicate the number and letter of each question and question part.
 - (b) Present your answers in the same order they appear in the exam.
 - (c) Start each question on a new side of a page.
 6. Read each question carefully, and answer each question completely.
 7. Show all of your work; no credit will be given for unsupported answers.
0. (1 point) Carefully read and complete the instructions at the top of this exam sheet and any additional instructions written on the chalkboard during the exam.
1. (9 points) Let t be the time, in hours, it takes for a student to complete a final exam. All students complete the exam within two [one] hours and the density function for t is given by

$$p(t) = \begin{cases} \frac{1}{b} (4t - t^3) & \text{if } 0 < t < 2 \\ 0 & \text{otherwise} \end{cases}$$

- (a) Find the value of b .
 - (b) What is the mean time for students to complete the final exam? Express your answer (i) symbolically in terms of b and (ii) numerically, using the value of b you found in part (a).
 - (c) Determine the cumulative distribution function $P(t)$. Express your answer (i) symbolically in terms of b and (ii) numerically, using the value of b you found in part (a).
2. (6 points)
- (a) Find the 2nd degree Taylor polynomial for $f(x) = e^{-x}$ at $a = 0$.
 - (b) Use this polynomial to approximate $e^{-0.01}$ to five decimal places.
3. (6 points)
- (a) Use the fact that $0.575757\dots = 0.57 + 0.0057 + 0.000057 + \dots$ to write $0.575757\dots$ as a geometric series.
 - (b) Use the formula for the sum of a geometric series to write $0.575757\dots$ as a rational number.

Note: Problem 4 is on the other side of this page.

4. (6 points) Write in your Blue Book the letter of each equation lettered (a)–(f) below. Next to each letter, write the number of the corresponding graph from among the graphs numbered (1)–(9) below. You need not provide any explanation; however, you must clearly list your choices. Note: Yes, there are more graphs than equations.

(a) $z = -\frac{1}{x^2+y^2}$

(b) $z = \sin(y)$

(c) $z = \cos^2(x) \cos^2(y)$

(d) $z = \frac{\sin(x^2+y^2)}{x^2+y^2}$

(e) $z = |x||y|$

(f) $z = xy e^{-(x^2+y^2)}$
