

Math 10B
Midterm Exam 1
January 31, 2013
...
Version A

Instructions

1. No calculators or other electronic devices are allowed during this exam.
 2. You may use one page of notes, but no books or other assistance during this exam.
 3. Write your *Name*, *PID*, and *Section* on the front of your Blue Book.
 4. Write the *Version* of your exam at the top of the page on the front of your Blue Book.
 5. Write your solutions clearly in your Blue Book
 - (a) Carefully indicate the number and letter of each question and question part.
 - (b) Present your answers in the same order they appear in the exam.
 - (c) Start each question on a new side of a page.
 6. Read each question carefully, and answer each question completely.
 7. Show all of your work; no credit will be given for unsupported answers.
-
0. (1 point) Carefully read and complete the instructions at the top of this exam sheet and any additional instructions written on the chalkboard during the exam.
 1. (6 points) The average value of a continuous function f for $2 \leq x \leq 5$ is 4.
Find $\int_2^5 (3f(x) + 2) dx$.
 2. (6 points) Find the area between the graph $y = 4 - x^2$ and the x -axis.
 3. (6 points) Let $F(x) = \int_{x^2}^{x^3} \sin(t^2) dt$. Find $F'(x)$.
 4. (6 points) A baseball is thrown upward from the top of a 48 foot tall building with an initial upward velocity of $v(0) = 32$ feet/second. The ball experiences an acceleration of -32 feet/second².
 - (a) What is the maximum height of the baseball and at what time does it occur?
 - (b) At what time does the baseball hit the ground (height = 0)?
