

MATHEMATICAL RESEARCH LETTERS

CONTENTS

Volume 1, Number 1

January 1994

---

<b>A remark on tube domains</b> by <i>Benedict H. Gross</i> .....	1
<b>Hyperbolic dynamical systems, invariant geometric structures, and rigidity</b> by <i>Renato Feres</i> .....	11
<b>Operator versions of the van der Corput lemma and Fourier integral operators</b> by <i>D. H. Phong and E. M. Stein</i> .....	27
<b>Noyau de la chaleur d'opérateurs elliptiques complexes</b> by <i>Pascal Auscher, Alan McIntosh, and Philippe Tchamitchian</i> ...	35
<b>CP<sup>2</sup>-stable theory</b> by <i>Michael H. Freedman and Zhenghan Wang</i> .	45
<b>General hyperplane sections of nonsingular flops in dimension 3</b> by <i>Yujiro Kawamata</i> .....	49
<b>On SL<sub>2</sub>(Z) and topology</b> by <i>Kefeng Liu</i> .....	53
<b>L<sup>2</sup>-estimates for a class of singular oscillatory integrals</b> by <i>Andreas Seeger</i> .....	65
<b>Moment estimates derived from Poincaré and logarithmic Sobolev inequalities</b> by <i>S. Aida and D. Stroock</i> .....	75
<b>Derived categories and motives</b> by <i>I. Kriz and J. P. May</i> .....	87
<b>On the diameter of plane algebraic curves</b> by <i>Fedor A. Bogomolov</i> .....	95
<b>The structure of the universal exponential solution of the Yang–Baxter equation</b> by <i>Nantel Bergeron</i> .....	99
<b>On the minimal volume hyperbolic 3–orbifold</b> by <i>F. W. Gehring and G. J. Martin</i> .....	107
<b>New examples of inhomogeneous Einstein manifolds of positive scalar curvature</b> by <i>Charles P. Boyer, Krzysztof Galicki, and Benjamin M. Mann</i> .....	115
