

MATHEMATICAL RESEARCH LETTERS

CONTENTS

Volume 13, Number 1

January 2006

Soogil Seo , <i>Circular distributions of finite order</i>	1
Ferruccio Colombini, Cataldo Grammatico, and Daniel Tataru , <i>Strong uniqueness for second order elliptic operators with Gevrey coefficients</i>	15
Sam Payne , <i>Equivariant Chow cohomology of toric varieties</i>	29
Salem Ben Saïd , <i>Huygens' principle for the wave equation associated with the trigonometric Dunkl-Cherednik operators</i>	43
E. B. Dynkin , <i>On extreme X-harmonic functions</i>	59
Frédéric Bourgeois , <i>Contact homology and homotopy groups of the space of contact structures</i>	71
Daniel Huybrechts and Richard Thomas , <i>\mathbb{P}-objects and autoequivalences of derived categories</i>	87
D. Kaledin , <i>On the coordinate ring of a projective Poisson scheme</i>	99
Enrico Arbarello, Igor Krichever, and Giambattista Marini , <i>Characterizing Jacobians via flexes of the Kummer Variety</i>	109
Nero Budur, Mircea Mustața, and Morihiko Saito , <i>Roots of Bernstein-Sato polynomials for monomial ideals: a positive characteristic approach</i>	125
Zhongwei Shen , <i>The L^p Dirichlet problem for elliptic systems on Lipschitz domains</i>	143
Katrin Wehrheim , <i>Energy identity for anti-self-dual instantons on $\mathbb{C} \times \Sigma$</i>	161
