

MATHEMATICAL RESEARCH LETTERS

CONTENTS

Volume 2, Number 5

September 1995

Fernando Q. Gouvêa and Barry Mazur , <i>Searching for p-adic eigenfunctions</i>	515
Norbert A'Campo , <i>On the shape of projective plane algebraic curves</i>	537
Richard B. Melrose , <i>The eta invariant and families of pseudodifferential operators</i>	541
Dražen Adamović and Antun Milas , <i>Vertex operator algebras associated to modular invariant representations for $A_1^{(1)}$</i>	563
S. Buckley and P. Koskela , <i>Sobolev-Poincaré implies John</i>	577
W. J. Mitchell and E. Schimmerling , <i>Weak covering without countable closure</i>	595
Pavel I. Etingof , <i>Central elements for quantum affine algebras and affine Macdonald's operators</i>	611
A. Tumanov , <i>Extending CR functions from manifolds with boundaries</i>	629
Noam D. Elkies , <i>Lattices and codes with long shadows</i>	643
Claude LeBrun , <i>Polarized 4-manifolds, extremal Kähler metrics, and Seiberg-Witten theory</i>	653
