

MATHEMATICAL RESEARCH LETTERS

CONTENTS

Volume 3, Number 4

July 1996

Robert Lazarsfeld , <i>Lengths of periods and Seshadri constants of Abelian varieties</i>	439
V. Guillemin and K. Okikiolu , <i>Szegő theorems for Zoll operators</i> .	449
Alexandru Buium , <i>An approximation property for Teichmüller points</i>	453
Indranil Biswas , <i>A remark on the jet bundles over the projective line</i>	459
Joachim Escher and Gieri Simonett , <i>On Hele-Shaw models with surface tension</i>	467
Tamir Tassa , <i>Regularity of weak solutions of the nonlinear Fokker-Planck equation</i>	475
Patrick Gérard, François Golse, and Bernt Wennberg , <i>A compactness result for generalized Radon transforms</i>	491
Luis M. Barreira , <i>A non-additive thermodynamic formalism and dimension theory of hyperbolic dynamical systems</i>	499
Michael Christ, G. E. Karadzhov, and Detlef Müller , <i>Infinite dimensional families of locally nonsolvable partial differential operators</i>	511
Nets Hawk Katz , <i>A counterexample for maximal operators over a Cantor set of directions</i>	527
Yael Karshon , <i>Example of a non-log-concave Duistermaat-Heckman measure</i>	537
A. Pajitnov , <i>Rationality and exponential growth properties of the boundary operators in the Novikov complex</i>	541
Bennett Chow and Sun-Chin Chu , <i>A geometric approach to the linear trace Harnack inequality for the Ricci flow</i>	549
