

MATHEMATICAL RESEARCH LETTERS

CONTENTS

Volume 4, Number 5

September 1997

A. B. Goncharov , <i>The double logarithm and Manin's complex for modular curves</i>	617
Huai-Dong Cao, Ying Shen, and Shunhui Zhu , <i>The structure of stable minimal hypersurfaces in \mathbb{R}^{n+1}</i>	637
Roberto Silvotti , <i>On the Poincaré polynomial of a complement of hyperplanes</i>	645
Minhyong Kim , <i>Purely inseparable points on curves of higher genus</i> .	663
Makhlouf Derridj , <i>Analyticité globale de la solution canonique de $\bar{\partial}_b$ pour une classe d'hypersurfaces compactes pseudoconvexes de \mathbb{C}^2</i> .	667
Vladimir Turaev , <i>Torsion invariants of Spin^c-structures on 3-manifolds</i>	679
Siqi Fu and Bun Wong , <i>On strictly pseudoconvex domains with Kähler-Einstein Bergman metrics</i>	697
Benson Farb , <i>The quasi-isometry classification of lattices in semisimple Lie groups</i>	705
Michael Christ, Alexander Kiselev, and Christian Remling , <i>The absolutely continuous spectrum of one-dimensional Schrödinger operators with decaying potentials</i>	719
Michael Christ , <i>Examples pertaining to Gevrey hypoellipticity</i>	725
Feng Luo , <i>A presentation of the mapping class groups</i>	735
F. V. Andreev and A. V. Kitaev , <i>Exponentially small corrections to divergent asymptotic expansions of solutions of the fifth Painlevé equation</i>	741
Percy Deift and X. Zhou , <i>Near integrable systems on the line. A case study—Perturbation theory of the defocusing nonlinear Schrödinger equation</i>	761
Daniel M. Oberlin , <i>An application of the resultant to oscillatory integrals with polynomial phase</i>	773
