

MATHEMATICAL RESEARCH LETTERS

CONTENTS

Volume 6, Number 3 & 4

May-July 1999

E. Grenier , <i>Boundary layers of 2D inviscid fluids from a Hamiltonian viewpoint</i> . .	257
Thomas Hewett , <i>Normalizers of finite subgroups of division algebras over local fields</i>	271
Iris Anshel, Michael Anshel, and Dorian Goldfeld , <i>An algebraic method for public-key cryptography</i>	287
Xavier Buff and Christian Henriksen , <i>Scaling ratios and triangles in Siegel disks</i>	293
Alexander Grigor'yan and Laurent Saloff-Coste , <i>Heat kernel on connected sums of Riemannian manifolds</i>	307
Boris Shoikhet , <i>Lifting formulas II</i>	323
Ido Efrat , <i>Construction of valuations from K-theory</i>	335
Ido Efrat and Ivan Fesenko , <i>Fields Galois-equivalent to a local field of positive characteristic</i>	345
Julie Tzu-Yueh Wang , <i>abc estimate, integral points, and geometry of P^n minus hyperplanes</i>	357
Hanspeter Kraft, Lance W. Small, Nolan R. Wallach , <i>Hereditary properties of direct summands of algebras</i>	371
Fernando Cardoso, Georgi Popov, and Georgi Vodev , <i>Distribution of resonances and local energy decay in the transmission problem. II</i>	377
Ivan Penkov and Vera Serganova , <i>Weight representations of the polynomial Cartan type Lie algebras W_n and \bar{S}_n</i>	397
D. Cruz-Uribe, SFO and C. Pérez , <i>Sharp two-weight, weak-type norm inequalities for singular integral operators</i>	417
Marcos Mariño, Gregory Moore, and Grigor Peradze , <i>Four-manifold geography and superconformal symmetry</i>	429
Lisa Carbone and Howard Garland , <i>Lattices in Kac-Moody groups</i>	439
András I. Stipsicz , <i>On the number of vanishing cycles in Lefschetz fibrations</i>	449
Steve Zelditch , <i>Spectral determination of analytic bi-axisymmetric plane domains</i>	457
Xiao Zhang , <i>A remark on: Lower bounds for eigenvalues of hypersurface Dirac operators</i>	465
Carlos E. Kenig and Elias M. Stein , <i>Erratum to: Multilinear estimates and fractional integration</i>	467
