

How to Course Plan

- Run your degree audit to determine which courses you have taken:
<https://students.ucsd.edu/my-tritonlink/tools/index.html>
- Find your major to determine what you still need to take:
<https://math-handbook.ucsd.edu/undergraduate/major-information/>
- Open the Course Planning section on the math page:
<https://math.ucsd.edu/undergraduate/course-planning/index.html>
- Use the Course Planning Sheet to plug in where you plan to take each course throughout the quarters
- Use the Planned Course Offerings as a guide to completing your quarter by quarter plan. Keep in mind that this can change each year, but courses are typically offered in the same quarters from year to year: <https://www.math.ucsd.edu/resources/planned-course-offerings/>
 - Typically students take 2 major courses a quarter
- Once you have completed your quarter by quarter plan, you can have an advisor review your plan using this form to request an appointment with an advisor:
